PREFACE

English is the most widely used language – both spoken and written – in almost all countries. Yet a lot of people – non-native speakers as well as a lot of native speakers – lack the knowledge of grammatical concepts which are absolutely essential for using the English Language in an error-free and acceptable form.

This book contains explanations as well as exercises – with Answer Key at the end – that will enable students and others alike to acquire skills necessary for the specific purpose of comprehending text and responding suitably using grammatically correct language.

I take this opportunity to express my appreciation to Karin Hamilton Jacobsen and Sophie Tergeist for encouraging me at all stages.

I'd also like to thank the entire team of bookboon.com for publishing several of my books, including this one.

1 THE ENGLISH ALPHABET

1.1 INTRODUCTION

It is to remind you that words are made up of letters. There are many different words in English Language. But they are all made up by using one or more of **only twenty-six (26) letters**. Together the 26 letters in the English alphabet form what is called the 'English Alphabet'.

In case you have forgotten, here is a list of the 26 letters in the English Alphabet in both their capital and small forms:

Capital:

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

Small:

a b c d e f g h i j k l m n o p q r s t u v w x y z

The order in which the letters of the alphabet are listed: **A, B, C**, and so on, is called the 'alphabetical order'.

1.1.1 VOWELS

In the list above five (5) letters are shown in **bold**; they are: **A, E, I, O, U**, and they are called **vowels**.

1.1.2 SYLLABLES

A **syllable** is part of a word which contains a vowel.

- A word which has only **one** vowel sound is a word of **one syllable**, for example, *small*.
- A word which has **two** vowel sounds has **two syllables**, for example, *English* (Eng – lish).
- A word which has **three** vowel sounds has **three syllables**, for example, *alphabet* (al-pha-bet).

1.1.3 CONSONANTS

The other 21 letters in the English Alphabet are called consonants. They are:

B C D F G H J K L M N P Q R S T V W X Y Z
b c d f g h j k l m n p q r s t v w x y z

1.2 MAKING WORDS FROM LETTERS AND SYLLABLES

Words are built up with letters and syllables. Some words are short, and they have only one or a few letters. Other words are long and have many letters.

1.2.1 ONE-LETTER WORDS

There are some words which have one letter only:

A or a: This short word means one only. We can have:

A (one) man or A (one) woman, a (one) dog, or a (one) table.

I: This short word is used for the person who is speaking or writing. This word is used only for people. When it is a word on its own, the letter **I** is always a capital letter. We can have:

I am learning about English words.

He asked me where I was going.

1.2.2 TWO-LETTER WORDS

There are a number of words in the English Language which have two letters only. Here are just a few of them:

am an as at be do go he if in is it
me my no on or so to up us we of

1.2.3 THREE-LETTER WORDS

There are a number of words in the English Language which have three letters. Here are just a few of them:

and bed car dig eat far got hit ill joy kin log
men not off pin run son tip use van win you zip

1.2.4 LONGER WORDS

There are a very large number of words in the English Language which have four or more letters. Here are some of them:

adverb book course desk eating flower green house
idle jump long manual name onion paper study
queen replied school table under valley words
yellow

1.2.5 FORMING WORDS

By placing letters of the alphabet in different orders we can make or form different words. As an example, think about the three letters **a**, **r**, and **t**. By arranging these three letters in different orders we can form the words **art**, **rat** and **tar**.

Not only are they three different words, but each of the words has a different meaning: **art**: this can mean a practical skill or talent, or something of beauty created. **rat**: this is an animal, a rodent.

tar: this is a sticky, black substance, which is often used on roads.

The order in which letters are arranged to make words is called '**spelling**'. The wrong spelling of a word changes the meaning of what you mean to write. For example, if you mean to write "*good writing is an art*", but by mistake you write "*good writing is a rat*" your readers will be confused!

So, it is important for you to be able to **spell words correctly**.

2 SOUNDS OF ENGLISH

2.1 VOWELS AND SOUNDS

In speaking the sounds of vowels (a, e, i, o, u) are made with mouth open.

In English, when a word has more than just one syllable, one of the syllables will – when speaking – be **stressed** or sounded more strongly, or **accented**. A dictionary might show you the syllable in a word which must be accented, by printing the symbol (ˈ) **after** it or by printing it (ː) **before** it.

Brain power

By 2020, wind could provide one-tenth of our planet's electricity needs. Already today, SKF's innovative know-how is crucial to running a large proportion of the world's wind turbines.

Up to 25% of the generating costs relate to maintenance. These can be reduced dramatically thanks to our systems for on-line condition monitoring and automatic lubrication. We help make it more economical to create cleaner, cheaper energy out of thin air.

By sharing our experience, expertise, and creativity, industries can boost performance beyond expectations. Therefore we need the best employees who can meet this challenge!
